

Dear Parent or Guardian,

Let's make this school year a healthy one!

The *name of school* is working with NH Healthy Kids to make sure that all children in *name of town* come to school healthy and ready to learn. NH Healthy Kids is a non-profit organization that provides access to quality health coverage for uninsured children. This school year, we will work together on a project called the NH Healthy Kids School Connection. The project will give uninsured *name of school* families the chance to apply for health and dental insurance for their children.

Children who get healthcare get better grades and miss school less often . That is why it is very important for *name of town* children to have access to health coverage. There are over 8,000 uninsured children in New Hampshire. Many of them are eligible for one of the Healthy Kids programs.

We will be looking at each child's school forms and contacting families who have not listed insurance information. We will give you details about the Healthy Kids eligibility guidelines and help you apply for the program. We look forward to working together to make children's health a priority!

Sincerely,

*School Nurse*

*Application Assistor*
